# Concorde Specialty Gases

**Concorde Specialty Gases** is a leading independent producer and distributor of specialty gases utilized in a variety of industrial, commercial and consumer applications.

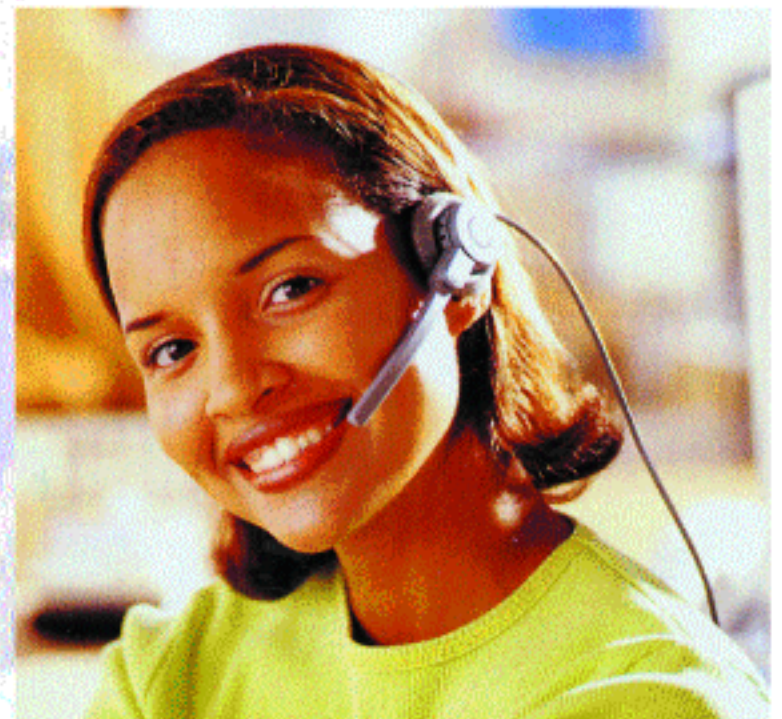

Concorde is your sole source for Super SF<sub>6</sub>. Made via a proprietary chemistry and manufacturing process, Super SF<sub>6</sub> is a unique formula of sulfur hexafluoride that sets a higher standard for purity, quality and low moisture content. Product quality is continually monitored to ensure your total satisfaction.

## Superior quality gas

**A price and quality leader**, Concorde helps companies compete in today's continuously changing marketplace and regulatory environment, delivering higher quality gases at lower cost. Concorde supplies SF<sub>6</sub>, rare gases, fluorinated gases and blends.

**With warehouses strategically located** in the United States, Canada and Europe, Concorde can quickly supply your needs. Our bi-lingual sales and service representatives are available to assist in expediting your order. We also offer same-day shipping throughout North America.

## Superior Service

# Super SF<sub>6</sub>: Sulfur Hexafluoride

All SF<sub>6</sub> gases are not created equal. Utilizing proprietary chemistries and refining technologies, Concorde has created Super SF<sub>6</sub> gas, a superior quality Sulfur Hexafluoride which features the lowest moisture content and least amount of impurities of any SF<sub>6</sub> gas in it's class.

## Super SF<sub>6</sub> SPECIFICATIONS

1. Mass Content of Sulphur Hexafluoride (SF <sub>6</sub> )	99.95%
2. Oxygen (O <sub>2</sub> )	100 ppm vol.
3. Nitrogen (N <sub>2</sub> )	250 ppm vol.
4. Water (H <sub>2</sub> O)	<5 ppm vol.
5. Hydrolyzable fluoride, expressed as HF	0.3 ppm vol.
6. Carbon Tetrafluoride (CF <sub>4</sub> )	100 ppm vol.
7. Toxicity	None

## Other Concorde Gases

### Fluorinated Gases

Tetrafluoromethane (R-14, CF<sub>4</sub>)  
Octafluorocyclobutane (C-318, C<sub>4</sub>F<sub>8</sub>).  
Perfluoropropane (R-218, C<sub>3</sub>F<sub>8</sub>)

### Rare Gases

Xenon  
Krypton
